This is a list of the publications added to the files of
Nematology Investigations between November 15, 1961 and
December 31, 1962. Most of these were indexed from the
original publications or from reprints received through
the courtesy of the authors. Others were indexed from
abstracting journals, and a few were listed from bibli-
ographies of published papers.

With pages printed on one side only and the two-column
format, 3 by 5-inch index cards can be made by cutting
and pasting titles.
